

Your school is NOT for the birds...

Robert Csigi knows that. He works hard to provide a clean, healthy, beautiful environment for the students, teachers, and families that attend Bergen County Academy in New Jersey. When resident Canada geese decided to live on his school grounds and athletic fields, Bergen County turned to FlightControl® PLUS—an effective and humane Canada goose repellent.

Goose droppings are costly, unsightly, and unhealthy. Protect student's health, your school's grounds, and these beautiful creatures by using FlightControl PLUS to humanely relocate geese off of your school's property.

Re: FlightControl Goose Control

My Academy high school athletic fields are located along a river which makes for a beautiful setting for athletic events. The beauty of the site was offset by the ugliness of the goose droppings that covered our fields, track and parking lots. The site was a perfect location for geese and was a major challenge for me.

I began using FlightControl Plus during the spring of 2003. By the second of four treatments my goose problem was under control. The geese started to migrate elsewhere and the product worked as designed. The students, staff, athletes and the public that use the fields recognized the fact the fields were free of goose droppings and thanked my grounds staff repeatedly. The disappearance of the geese on the fields, the elimination of the health risk (goose droppings), and a maintenance cost savings (no dropping clean up) has become a positive for me instead of the constant negative.

I continue to use FlightControl Plus to maintain the control of the geese and I have finally found a product that works as promised.

Sincerely,

Robert Csigi
